Management of the various types of degradable and non-degradable waste

Various kinds of practices and tactics have been adapted to the system towards the waste management of solid waste and E-waste. To achieve a healthy and conducive environment, our institution is strictly following the waste segregation by employing red and blue waste bins serving the specific purpose of keeping dry and wet waste separately throughout the campus. CTIMIT is also serving humanity towards a great cause by 'saying no to plastic' campaign.

The institute has a tie-up with "GREEN BIRD RECYCLING" which is duly certified by the Punjab State Pollution Control Board and Central Pollution Control Board for recycling of E-waste. The Institute follows the prescribed process for collecting and storing all unusable electronic wastes like computers, printers, keyboards, ups, floppies, CDs, mice, and other IT equipment. These items are stored in the proper location before being handed over to the recycling agency.

Waste Recycling System

Affiliated to IKG-PTU (Kapurthala) & Approved by AICTE (New Delhi)

CT Institute of Management and IT believes in the ethic of "complete recycling" and meets sustainability goals through food and garden waste collection and using it in the Biogas Plant on campus. By turning our food scraps and yard waste into biogas, we are reducing the amount of organic waste and turning our waste streams into a beneficial, valuable soil amendment.
